Local Happenings

G. S. Brewerton was a Raymond visitor on Monday morning this week.

Maurice and Athol Cooper were Lethbridge visitors Saturday evening.

I. M. Coombs of Cardston was in Raymond on Monday this week.

Lee Brewerton motored to Calgary Monday and returned on Wednesday.

D. Ferguson of the Chrysler Sales Force was here on Monday.

Mrs. J. Bishop, Cardston was a Raymond visitor over the week end.

The Red and White Stores have an ad. in this issue.

The sun was shining nearly all afternoon on Wednesday.

Mr. Burton of Commercial printers Lethbridge was in town Monday.

Mrs. Chas. McCarthy returned home on Tuesday evening, after spending the winter in Utah.

C. H. Elder sold a Hart Parr Tractor to Wm. Zemp on Monday this week.

Mrs. Solon Low and Mrs. Kenneth Allred were Lethbridge visitors on Saturday.

T.A. Spackman Stirling, owner of the Red and White stores was here on Tuesday this week.

Mr. and Mrs. R. R. May, Miss Ardaith Turner of Magrath, and Mr. Chas. R. Walker of Cardston were in Raymond on Sunday.

Wednesday forenoon is always busy in the stores, people taking advantage of the specials which are offered each week.

Notices are out for an Overall and Apron Dance in the Opera House Saturday night. No one told us about it but we saw the notices.

Dr. Heal was enjoying the wonderful weather of the weekend in his lovely Nash Sedan recently purchased from King Motors.

Monday afternoon's rain and Tuesday morning's rain and snow held up farming operations for half of the week, and the roads which had commenced to dry nicely are very rough and full of holes again.

Mehew Bros. have purchased a new Chevrolet truck, with which to deliver British American Gas, and Oil to farmers in their fields, delivery of the truck was made on Monday this week.

Wedding Bells

KIRKHAM TOLLESTRUP

A very pretty wedding was solemnized on May 4th at the home of Pres. Geo. W. Green in Lethbridge, when Miss La Rosa Tollestrup, daughter of Mr. and Mrs. R. W. Tollestrup, and Joseph Kirkham, son of Mr. and Mrs. A. W. Kirkham, were united in the holy bonds of matrimony.

The young couple spent the week end at the Marquis Hotel Lethbridge, and when they returned home a very dainty wedding supper was served at the home of the bride only the members of the two families being present.

The young people are both popular members of Raymond's younger set and the best wishes of their many friends and the Recorder will go with them in their journey through life.

Mrs. Jos. Kirkham was the honored guest at a miscellaneous shower held for her at the home of Mrs. Lee Brewerton on Tuesday evening. The evening was spent in games and the unpacking of the many beautiful presents. Mrs. Kirkham thanked all of her friends very graciously for their many gifts. A dainty lunch was served and everyone had a most enjoyable time. Nearly a hundred ladies were present.

Conference Well Attended

The regular Quarterly Conference of the Taylor Stake of Zion was held in the Stake House on Saturday and Sunday, May 11th and 12th with a very good attendance at all sessions. The weather man was on his best behavior and despite the rather late season and rush of work, the various wards were all very well represented.

As it was a Convention Conference the various Auxiliary organizations all held forth separately to take up their work, the Relief Society holding two sessions on Saturday at 10 a. m. and 2 p. m. and the other auxiliaries holding forth between and before the meetings on Sunday.

The first general session of the Conference commenced Saturday night at 8 p. m. and was featured by a splendid talk on "Tithing" by Pres. H. S. Allen, and a talk on "Priesthood" by Pres. O. H. Snow. Elder Geo. A. Holt, of the Sunday School General Board of Salt Lake City also spoke for a few minutes.

SUNDAY SCHOOL SESSION

At 10 a. m. Sunday morning, the Sunday School session commenced, with the Stake Sunday School Superintendent in charge and Charles O. Asplund conducting the meeting. This was the children's meeting and nearly all who took part were young members of the Sunday School. Talks were given on the course of study for the year by quite a number. The special musical numbers were very commendable as they showed some remarkable talent. The Laycock boys on the Clarinet and Violin; Nile Fletcher of Magrath on the Violin, accompanied by his brother on the piano, and the Girls Chorus by members of the Stirling ward all won their audience by their splendid rendition of their numbers.

Elder Geo. A. Holt, read a number of poems, asked a number of questions and directed his remarks to the "Power of Thought in Prayer."

AFTERNOON SESSION

The large hall was filled to its utmost capacity when the afternoon meeting was called to order at 2 p. m. Pres. J. W. Evans was the first

speaker, referring to the records made by the church in most cases, but regretting that out of 52 people married in the Stake during 1928, only 12 of them had been married in the Temple according to the commandments of God. He urged that we work out our problems together, keep in mind the marriage covenant and make better records during 1929.

Sister Alder of the Church Relief Society Board said that she had found conditions in the Stake very satisfactory and that she could carry a splendid report back to the authorities in Salt Lake. Her remarks were on the thought that "Love and Service are the big things in life."

Elder Geo. A. Holt's remarks were centered on the thought "Giving Willing Service Leads to Leadership." He read the parable from Matt. 25: 14-30, to emphasize this thought.

The General Church and Stake authorities were presented by Pres. O. H. Snow, and supported by a unanimous vote.

SUNDAY EVENING

The Sunday evening meeting was under the direction of the M. I. A. organization and was featured by a variety of musical numbers. The Stake choir rendered the opening and closing numbers, three male choruses were rendered, the Glenner Girls of the Raymond First and Second Wards rendered a very nice Girls chorus. Miss Clara Coleman of Magrath delivered her contest speech and was highly complimented by Elder Holt in his remarks. Sister Alder also addressed the meeting.

MUSIC

The music of all the sessions of the Conference except Sunday morning, was under the direction of Stake Chorister C. F. Tollestrup, and all the anthems were very good, featured on Sunday afternoon by a composition by Elder Tollestrup. "Behold I Send You Elijah." This was a very good number and reflects credit on the ability of the composer.

Besides the choir numbers in the Sunday afternoon meeting, Wm. Clark of Stirling rendered a splendid vocal solo.

MARKETS AND PRICES

For the past month the grain market has been characterized by a general decline in price. Quotations for oats remained firm and the demand active, but barley and rye have followed the downward trend of wheat described elsewhere in this Letter.

Domestic demand now being normal and that for export increasingly active the volume of supplies is the ruling factor in the live stock market, and as receipts have been very moderate, prices of both cattle and hogs have again risen. The market for butter has been firm and reflects the depleted condition of storage stock, those on hand on 1st April showing a decrease of over 40 per cent. from those on the same date last year. The impending arrival from New Zealand of what, at this season, constitutes a fairly large shipment, has been responsible for slightly lower prices recently. Quotations for cheese have also receded somewhat from last month's level.

Favorable weather reports have tended to lower the price of cotton recently, planting having previously been retarded, except in the most southern portion of the belt, by unfavorable weather. This year's carry over will probably be between 1,000,000 and 1,200,000 bales less than last year, and world takings of American cotton are on the increase. Unofficial estimates of the increase in acreage do not indicate more than 3 to 5 per cent., and unless the yield is well above the ten-year average supplies will be no more than adequate.

The general trend of the rubber market has been towards lower prices. High tire inventories at the factories and increases in raw stocks at the mills and in shipments from the East make for cautious purchasing until the situation clears. The anticipated increase in the United States tariff and the consequent accumulation of stocks by traders dominate the sugar market, but advices from Europe indicating adverse weather conditions and delayed field work in sugar belt areas, and the fact that the British budget contained no change in the sugar tariff have given additional impetus to demand and induced higher prices.

The condition of the non-ferrous metal market has been chaotic during the past month. A very marked decline in the demand for copper followed the sharp rise in price until the customs smelters reduced their quotations, and, while they control no very large proportion of the output, their influence upon the market exerted sufficient pressure to bring about general reductions. The demand, and, inevitably, the quotations for lead and zinc increased as copper became more and more costly, but when quotations for the latter reverted to what is admitted to be a reasonable figure the demand for the former metals fell off and prices declined. The base metal situation has now become more stabilized.

Our index number of wholesale prices has fallen from 91.94 as at 15th of March to 91.21 as at 15th of April.—Canadian Bank of Commerce Monthly Commercial Letter.

By Products Of the Beet Sugar Industry

(By M. H. Chapman, Idaho Falls)

The Beet Sugar Industry is more or less dependent upon the Livestock and Dairy Industries, but in order to make the Livestock and Dairy Industry profitable it must depend upon the Beet Sugar Industry.

It is our problem to learn the best methods and then to educate the farmers, who, by the way, are our customers, so that the best results may be obtained.

We have made some study of these problems and I will give what I consider the best methods, as well as the most profitable to farmers and feeders alike.

BEET TOPS

When the beets are topped there remains in the field from one third to two thirds as much weight, in the shape of tops and crown as has been delivered to the receiving station in the shape of roots. The quantity, of course, varies with the soil, weather conditions and the amount of water applied and also the maturity of the crop. Under ordinary conditions about one-third of the total weight of the crop is left in the field. We determined this fact by weighing 300 lots of 25 beets each at our experimental farm on the Osgood Project, other experiments carried on for years in other sections verifies our findings.

From the above we find that a low tonnage of 10 tons per acre furnishes the grower with about 3 1-3 tons of tops and crowns to the acre, or food value of about 50 p.c. of alfalfa; therefore being very conservative we find that feed from a 10 ton crop of beets is worth at least \$13.32, if alfalfa is worth \$8.00, providing the tops are properly cared for. When we follow this up to a 20 ton crop we find the after feed is worth at least \$26.64 per acre.

In order to show the value of this feed a majority of which is lost in the Idaho District each year, we will take the Shelley district as an example. They had an average of 114 tons of beets to the acre and they harvested 2500 acres, which would leave about 12,000 tons of beet tops and crowns, worth at least \$48,000.00.

I do not know exactly how much of this feed was used or saved, but I venture to say that there was lost at least one-half of it, or about \$24,000.00 worth of good feed. Our job is to show the farmers how to save this and when we do, the present factories will not be able to take care of the beets grown in the Idaho District. These

figures may seem large but I am convinced that they are too small.

I feel quite sure that the benefits derived from plowing beet tops under are very small, and after going into this question rather thoroughly I believe that unless tops are plowed under directly after topping they are of little value as fertilizer.

We should advocate the following (at least until we find something better) "Two Crops in One"—Beets for the factory tops for the Farmer.

Just as soon as the beets are topped for the tops into bunches the same as hay (every farmer at least tries to put up his hay in good shape) and the same care should be taken with the tops. After the tops are bunched the best method is to haul them to the stock yard and stack as follows: Place 24 inches of straw on the ground then a 12-inch layer of tops, then 8 inches of straw, then tops, etc. topping off stack as usual, and either take out of the stack with hay knife or loose, but always protect open stack with straw.

Other successful growers and feeders leave tops in bunches all winter, hauling same as needed, but always having a supply on hand at feed corral so as not to haul out of an extremely muddy field.

At one time we always siloed our beet tops and where care was used in feeding this proved very successful, but when advocating this to growers, explanation should be made on account of fermentation and chemical changes taking place in the silo, that unless they know how to feed they should be advised as to rations, etc., or loss of stock will result.

The feeding of tops as we have practiced it for some years is no doubt very wasteful and should be discouraged. If they are to be fed in the field they should be bunched first so as to save as much as possible.

I feel very certain that an actual harvest of the tops should be urged to all of the farmers so that the value of this crop may be impressed upon them. This will, no doubt, stimulate the securing of acreage.

We had in the Idaho District in 1928 beet tops with a value of \$300,000.00 on 24,000 acres of land. We did not save anywhere near this amount.

The hay crop in this same district on 100,000 acres was valued at \$1,500,000.00. It was saved—why not save the tops?

(Continued next week.)

CROP REPORT

Alberta. Western Area.—Wheat seeding is well advanced with about 50 p.c. seeded. The sugar beet acreage will probably be 10,000 acres as compared with 7,000 last year. About 60 p.c. has been planted as compared with 80 p.c. at this time last year. Northeastern Area.—Wheat seeding is about 50 p.c. completed and is well ahead of last year. Southeastern Area.—40 p.c. of the seeding has been done under favorable weather conditions.

Saskatchewan. Northern Area.—In most section wheat seeding is well advanced, with weather satisfactory, although some localities are backward. Southern Area.—Under favorable conditions good progress has been made, with wheat seeding from fifty to one hundred per cent completed. Some headway has been made in seeding other grains.

Manitoba.—More than the usual fall ploughing was done and soil is in good condition. Wheat seeding is 80 p.c. to 90 p.c. completed. Owing to cold weather germination has been slow. There is ample moisture for the present. Seeding of coars grains is under way.

News Notes

Watch your cows. The town is advertising for a man to impound cows that are stray within the city limits. Read it.

C. W. Card of Cardston, with his new Chrysler 65 Livery car, was in town on Thursday with a representative of the Texas Oil Co.

AMUSEMENT TAX REDUCED

A recent announcement from Edmonton stated that the amusement tax had been taken off tickets of 25c and under.

It is hoped that this is a fore runner of an entire removal of the Amusement Tax, and the Capitol Theatre, in view of this fact, announces that from now on all Sound Pictures will be shown for 65c for Adults, and 25c for children, tax included. This is in harmony with Mr. Brewerton's policy of giving the public a 1 entertainment at as reasonable a price as possible.

—From the Bank of Montreal Crop Report.

MR. WM. McDONNELL

Who has been appointed Superintendent of Alberta Branches of the Bank of Montreal.

The Bank of Montreal announces the appointment of Mr. Wm. McDonnell as Superintendent of Alberta Branches, with headquarters at Calgary, to succeed Mr. C. W. Chesterton, who has been appointed Superintendent of Branches in British Columbia. Mr. McDonnell who was born and educated at Moncton in 1899, and after experience at other branches in Eastern Canada was transferred to Winnipeg in 1906. A few years later he became Accountant at Moose Jaw, and after holding a similar position at Port Arthur returned as Manager to Moose Jaw in 1912. From 1917 to 1923 he was Assistant Manager in Winnipeg, and in the latter year was promoted to the position of Inspector of Branches in the Western Division, in which capacity he was in intimate touch with business activities throughout the three Prairie Provinces. For the past four years Mr. McDonnell has held the position of Assistant District Superintendent of Ontario Branches.

At the S. of A.

Principal O. S. Longman is at the present attending a meeting of the Agricultural School principals at Edmonton; Mr. Longman is expected back on Saturday afternoon.

Chas. O. Asplund Instructor of Animal Husbandry is at present in the Glenwood district in the interest of Pig Club work.

The year books arrived this week and are now in the mail, so students and advertisers be on the look out.

The rainfall for the month of May up to the present time is 1.6 inches; 44 inches falling in the last storm.

D. G. Gilbert, School Fair Organizer reports the entry of the Purple Springs School Fair into the School Fairs Association. This brings the total up to fifteen for the Raymond district two more than last year. The other new entry is the Maryberries district.

If you like this paper tell your friends; if you don't like it tell us.

DIET

When you begin to take on weight And your waistline's somewhat hazy; You're either getting old, my boy, Or else you're getting lazy.

One reason why part of the world is sane is that it can't afford to be anything else.

BOTTLE FLOATS 2,500 MILES

After having floated 2,500 miles in 434 days at sea, a bottle was recently picked up at North Queensland. It had been dropped overboard on October 7, 1927, by a British vessel while in a most desolate part of the Pacific Ocean, 1,000 miles north of the Fiji Islands. In it was a message asking that it be returned to the Meteorological Office of the British Air Ministry, which is having 494 ships sailing the seven seas drop similar bottles every day in a plan of securing data to be used in tracking sea currents.—Calgary Herald.

WHY NOT MIX IT UP

The spring is advancing, true the season is getting late, and nearly everyone is worrying about the grain which is not planted. The soil is full of moisture and very day of cloudy wet weather, as we have had this week, means that grain will be late in ripening and in danger of being frozen. Beets are not damaged much by light frosts, but it doesn't take many degrees of frost to damage wheat, and what a pity it is to see the way grades and prices are knocked when frost gets the crop.

We have a way out, and that way is mixed farming. A flock of sheep, a bunch of pigs, dairy cows and chickens. All sure crops, all bring good returns, and can all be kept on the by products of the farm.

Sheep when well taken care of and properly housed will yield from \$ 3.25 to \$ 4.00 worth of wool each per year the owner has the increase of the lamb crop which in some small flocks is 200 p. c. and in some large ones as high as 100 p. c. Sheep help keep the weeds down and do not require a great deal of attention.

Dairying is pleasant, profitable, and certain, and good cows soon pay back their price and good interest besides. And then there are the calves which bring good prices as veal baby beef or finished beef on the market.

And so we could go on, chickens and hogs not only help with the living on the farm, but bring a good income when properly looked after and can be kept very largely on separated milk, screenings from grain and chopped grain which may not bring much on the market. And by actual test, hogs have made No 5 wheat worth more than \$ 1.80 per bushel when marketed by feeding.

A good program of mixed farming would relieve a great deal of our anxiety over the rain and wet weather we are having. We also need mixed farming to profit to the fullest extent by our best raising, as we have the opportunity of increasing very materially the value of the best crop through the use of the by-product. The article on this subject on the front page will explain better than we can, just what this means.

Let us stabilize ourselves and the district, and relieve ourselves of so much anxiety by working gradually into mixed farming.

RURAL RHYMES FOR FARMER FOLKS

BY ALF. OSMOND

BLESSIN'S IN DISGUISE

We've had the rain and hail and snow and now we need the shine to make the beans and cabbage grow and shoot the tender vine. My brothers feel a little blue because the spring is late but I am sayin' unto you the season will be great. This plin' up the banks of snow and shootin' down the rain and makin' winds of winter blow is fine for beets and grain. I like to see a lot of wet come whirlin' through the air, because it makes a better bet that water will be there. I guess it hurts our feelin's some to have to get a boat and have our nose and fingers numb and wear an overcoat, but never mind, I tell you what the times are goin' to change and sheep will have forget-me-not—a finer, better range. I heard a little robin say that she will build her nest with sticks and leaves and bits of hay with her old-fashioned zest. I thought I heard some natives yarn about their spawin' beds and chickens foolin' round the barn have somethin' in their heads that keeps them scratchin' for to live just like us humans do, so I believe we ought to give some hopeful symptoms too. I'll bet the sun is shinin' bright behind them clouds of rain, and that the Spring will treat us right in growin' hay and grain. I'll bet if we will do our part, the weather man will say, "Cheer up your sad and lonely heart. The sun will shine today."

—From the Utah Farmer.

FRIGIDAIRE COLD CONTROL

The inside story of how the famous Frigidaire Cold Control came to be a fact that electric refrigerator in the house often has its beginning under the roof of an mechanically inclined remodeler with a bent for amateur experiments.

Back in the days when the installment plan of an electric refrigerator in a house was a topic of discussion for blocks in every direction, the proud

user found that he had a plaything much more absorbing than an automobile carburetor, according to E. A. Lowden, Canadian Manager of Frigidaire Corporation. Some rose to the opportunity in a grand way. By changing the temperature switch with the family screw driver they found they could run up the box temperature to cut down operating costs and run it down to build up an ice cube reserve.

As the switch was not destined to produce such thermal acrobatics trouble often followed. Users were cautioned to leave it alone. Finally the company covered the switch with a tight metal cover.

But everywhere amateur temperature adjusters responded to such advice with disconcerting unanimity. Matches were used to block the switch so it would not shut off. Some ran wires under the switch cover to accomplish the same result. Others whose genius leaned to voltage disarmed that by installing a short circuiting snap switch they could get the same results. No one particular temperature was sought. What was wanted was a choice of all temperatures.

Dealers and salesmen argued that an electric refrigerator should be operated at a constant box temperature—somewhere below 50 degrees where food spoilage begins—but ion and fire at the Cleveland Clinic freezing compartment between meals. They advised users to leave the switch adjustment alone.

Then factory engineers completed some research and experiments they had been conducting for several years and the Frigidaire Cold Control was the result. This device is not merely a temperature adjustment for the food compartment but is primarily designed for controlling freezing speeds in the dessert and ice making trays and is capable of producing near-zero temperatures at the turn of a handle. And it enables the user to restore normal refrigeration temperatures without calling in expert assistance.

"Apparently the Cold Control was what the public was seeking when it was tinkering with switches," said Mr. Lowden, "for soon after its introduction, the sale of Frigidaires equipped with this device leaped to new high levels within a month, showing that once again the public had blazed a path for industry to follow."

CLEVELAND DEATH TOLL

MOUNTS TO 118

FIRE FOLLOWS BLAST; OVER 100 LIVES ARE LOST

Victims in Cleveland Tragedy Mostly Patients but Include Nurses and Doctors—Pedestrians Fall on Streets Overcome by Gases—Hospital Roaring Mass of Flames

Cleveland, Ohio, May 16—With gas-poisoned victims succumbing one by one during the night the death toll in yesterday's disastrous explosion carried out inert bodies, gassed today hospital had reached 118 today. About two score bed-ridden survivors lay waiting for death and physicians predicted that eventually those whose bodies were poisoned with the deadly gas would die.

Not only patients saved from the blaze of the nationally known hospital were numbered among the almost doomed survivors. Nurses and doctors who saved their charges, firemen and policemen, who risked their lives in acrid yellow smoke to carry out inert bodies, gasped today for a fleeting breath. Victims were compared to "walking gas" cases of the late war.

Physicians stated that the gas had attacked the blood of those who came in contact with the fumes destroying the red corpuscles and bringing death almost irresistibly more as it worked. Administrations of oxygen and blood transfusions already have failed in some cases to nourish the waning strength of the blood.

MRS. ANGUS ANDERSON BURIED AT STIRLING

Funeral services over the remains of Mrs. Angus Anderson, were held in the Stirling Assembly Hall Thursday afternoon at 2 p.m., with Bishop A. E. Fawns in charge. A large crowd of relatives and friends were present to show their respect to the deceased and her family.

Mrs. Anderson had been ailing for some time, but her death came as a surprise to her family and friends.

The speakers were Donald Howard Hardy, who extolled the beautiful life of the deceased, and offered words of comfort and consolation to the sorrowing husband and three small children, who mourn the loss of a loved one and mother. Elder Wm. C. Corder a vocal solo as a speaker.

Interment was made in the Stirling cemetery.

Among those present from Raymond were: Mr. and Mrs. D. A. Ben-

EXAMINER PRESS PLANS BUILDING

MODERN EDIFICE WITH ROTARY PRESS WILL OCCUPY EIGHTH AVENUE SITE

The Examiner Press, publishers of the Market Examiner and the Western Oil Examiner, as well as several other publications, has purchased the southwest corner of Eighth Avenue and Fifth street west and will erect a three-storey building in which will be located its plant, offices, a store with fifty feet frontage facing Eighth avenue west, and some twenty bachelor suites which it is expected will be used for officials later on.

The Examiner Press has occupied the second floor of the old Albertan building, now the property of the Solloway, Mills and Company, Ltd., for the past eight years. Expanding business has necessitated a change of location.

Modern Equipment

It is expected that the new building will be ready for occupation by the plant in July. A new rotary press will be installed and other new equipment will make the printing plant one of the finest in the city.

Work on the new building will be commenced Saturday, it is announced. A. Pirie is the architect and Sam Haslam the contractor.

Everett D. Marshall, head of the firm, left the Herald, where he had been employed for 25 years, twelve years ago this month. Mr. Marshall commenced on the Herald as a printer's devil and occupied every position on the staff until he became editor. On leaving the Herald, he commenced the Market Examiner.

The Western Examiner has now been published for over three years and is an offshoot of the Market Examiner, in which a comul of oil news was published each week when there was little to induce such optimism.

Mr. Marshall is one of the real pioneers of oildom. Jean Grant, who has been associated with Mr. Marshall was the first woman's editor on the Herald, and is business manager of the various enterprises of the Examiner Press.—Calgary Herald.

Born to Mr. and Mrs. Maurice Cooper at the Van Haerlem Hospital Lethbridge on Wednesday, May 14, a girl.

BREEDERS AND FEEDERS SHOW and SALE IN LETHBRIDGE IN OCTOBER

Tentative Dates Set for October 2nd
and 3rd at Exhibition Grounds in
Lethbridge — Opportunity
for Ranchers and Farmers

The district surrounding Lethbridge is in a particularly favorable situation insofar as the live stock industry is concerned, in that we have perhaps more than anywhere else in Canada the fortunate combination of an abundance of high-class roughages, a comparatively mild climate, as well as large numbers of cattle and sheep on the adjacent ranges, these being, generally speaking, of better breeding and quality than is found on feeder markets.

It has long been in the minds of men interested in the live stock industry of Southern Alberta that Lethbridge would be a logical location to hold a show and sale of such stock as our range men have for sale and the irrigation farmers have need of in the utilization of fodder crops; also a show and sale of such breeding ewes and rams as will be required to satisfy the increasing demand for this class of live stock from the irrigation district.

The Lethbridge Exhibition Board is fostering and have appointed a committee to organize a show and sale of such stock as will be in demand this autumn, namely feeder steers, feeder lambs, ewe lambs, breeding ewes and rams.

The show and sale will be held at the Exhibition grounds at Lethbridge on Oct. 2 and 3, 1929. These dates are tentative and may be changed to suit seasonal developments. A sale at Lethbridge has a distinct advantage to both the seller and the purchaser, in that it will save unnecessary freight charges and unnecessary handling of stock.

The show and sale committee would welcome enquiries, either from those with stock to sell, or from prospective buyers. These should be addressed to the secretary of the committee, Mr. R. W. Gardner, Sherlock Bldg., Lethbridge, or any of the members of the show and sale committee, the personnel of which is as follows: M. L. Freng, R. W. Gardner, C. H. Giffin, Fred Horne, Alex McKenzie, Wilbur McKenzie, N. T. Macleod, W. H. McIntyre, Arthur Newman and George Ross.

High Tension Wire Breaks

One of the wires from the Power House to the Sugar Factory blew down during the recent storm and the two broken ends of the wire fell onto a strand of barb wire fencing and kept the circuit going into the Factory and no one noticed the broken wires. On Wednesday one of J. W. Evans men was driving some horses past and one of the animals came in contact with the wire and was knocked to the ground; Vernon Henry who was passing was inspecting the horse and he touched the charged wire with his hand and across his chest. He was knocked out and received nasty burns but is able to be around again now. The circuit was grounded and the horse and Mr. Henry removed safely and the broken wire then repaired.

Welling News

(From our own correspondent)

Welling, May 14.—Over 90 p.c. of the beets are seeded in the district around the Welling and Anderson beet dumps.

Between showers the country is busy at work. There is about 40 p.c. of the grain in seed, but the farmers are still waiting to burn stubble. Nearly all the farmers are using tractors. Geo. E. Gunning is using a 30 h.p. Caterpillar, the first in one of its kind in this district.

Friends of Julia Cox will be glad to know that she is rapidly recovering from her operation. She is expected home the latter part of this week.

Arthur Day found people in Welling busy with the spade. Many fruit trees and evergreens were planted. They were supplied through the LaPrairie Nursery.

N. W. Peterson purchased a Chevrolet light delivery from the Raymond Motor Co. last Sat. It was the car formerly owned by Mr. Piegrass.

Mrs. Geo. E. Gunning who has been visiting here has returned to her home in Spokane. Mr. and Mrs. Gunning were guests at the Marquis Hotel last week.

There are still six children absent from school with the mumps.

Mrs. Arlo Palmer and daughter, Donna Jean are spending a few days at the home of J. T. Heninger, while her mother, Mrs. Heninger is at their ranch near Wrentham.

The Welling Sunday School was well represented at the 9 o'clock meeting held in the High School Sunday morning, of the 113 officers, 12 were present.

Miss Irene Lowry of Taylorville is staying at L. R. Workman's while Mrs. Workman is having some dentistry work done in Lethbridge.

Hyrum Ririe is back from Utah and is hard at work on his farm here. He has Kenneth Hindley of Magrath helping him.

Ernest K. Bullock and family are now living in their new home.

Master Kay Bullock, son of Mr. and Mrs. Alma Bullock who has been out of school with eye trouble is much improved and returned to school last Monday.

High School Column

WHEN WE HAVE BORNE IN MEMORY WHAT HAS TAMED

When we have borne in memory what has tamed

Great students, how well studied thoughts depart

When we change notes for papers, And desert the students' rooms so cold,

Some fears unnamed we have old High School.

Are we to be blamed?

Now when we think of them and what they art,

Verily, from the bottom of our hearts Of those disgraceful marks we are ashamed.

For greatly must we puzzle, we who find

In them a pitfall for our luckless pen; And we by our false knowledge were beguiled.

What wonder if a student now and then,

Among the many movements of his pen

Writes things he does not know, And would not know again.

With apologies to Wordsworth.

The school is very quiet, that is, comparatively speaking, due perhaps to the weather, and perhaps to the fact the teachers' confidential report is being prepared.

BASEBALL

Team "C" are the victors of the School League, having won three out of the four games they played.

Grade Ten lost in both games played against the remainder of the school which probably accounts for the fact that Wilford did not report them to the Editor.

GRADE XII'S CONTRIBUTION
We thought we heard a voice cry "Sleep no more!"

Grade XII hath gone to sleep—"Most dreadful sleep!"

Sleep that sends Aubrey out for air The death of all his notes and history dates.

Bane of dull minds, Biology's second course

Chief incentive to stay in class.

Mr. Low:—What do you mean?

Grade XII:—Still he cried "Sleep no more!" to all the class.

Grade XII hath murdered sleep and Therefore Wilburn shall sleep no more.

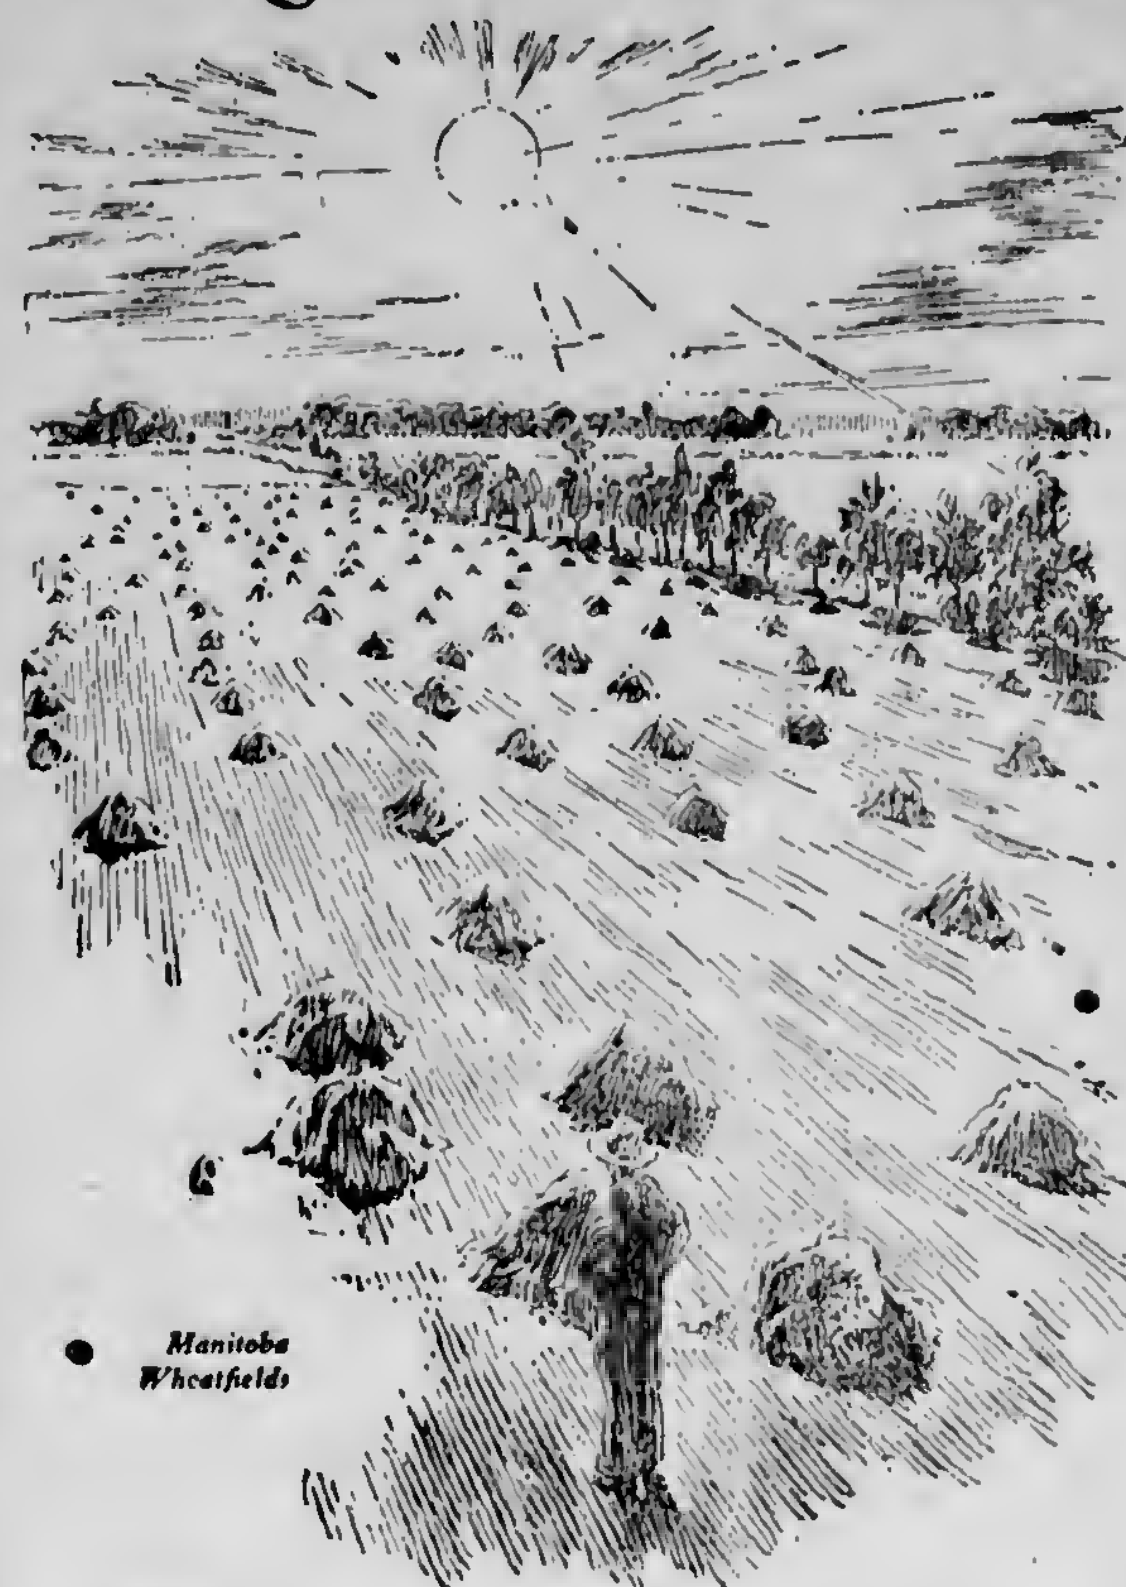

By permission of Wakespera.

The staff have been so liberal in giving Grade XII pieces of their mind that they haven't much left.

Jennie is going to have her coat shortened, she can't wear it any longer

The end-all and the be-all here.

COLUMBIA PICTURE MAKES
Progressive Steps in "TALKIES"
DIRECTOR OF "THE YOUNGER
GENERATION" REPRODUCES
TALK REALISTICALLY

Fannie Hurst's "The Younger Generation," which is coming to the Capitol Theatre on 16, 17, 18, is the most recent of new talking pictures to reach the screen.

Directed by Frank R. Capra, creator of many notable screen hits, the picture features what might well be called an all-star supporting cast. Mr. Hersholt, generally regarded as one of filmdom's greatest character delineators, is seen as the old-fashioned father of two modern children who have conflicting ideas and ideals in social life.

Linn Basquette, who won everlasting fame in the title role of de Mille's "The Goddess," is seen as Hersholt's daughter; Rosa Rosanova, noted Russian character star, as his wife; Ricardo Cortez as his obstinate and ambitious son; Juliana Johnston as a society debutante, and Rex Lense as a musician whose talents are employed by gangsters as a ruse to rob a busy New York jeweler.

"The Younger Generation" is a simple human drama throbbing with heart appeal. The characters cease to be creatures of fiction and actually live upon the screen. This life-like quality is almost startling through the dialogue and sound effects with which the picture has been synchronized. There is no doubt but the director has benefited by the mistakes the pioneers made in the sound field, since the talking and sound effects are reproducing with amazing realism. Columbia has certainly taken a step ahead in the "talkie race" with this production.

NEW POOL ELEVATORS

Between March 22nd and May 6th this year the Alberta Wheat Pool has purchased 22 local elevators and has 41 new elevators under construction. The new elevators being built are 35,000 and 40,000 bushels capacity and the majority of those purchased are of 30,000 bushels capacity. The addition of these houses bring the total elevators owned by the Alberta Pool to 381.

Elevators have been purchased at the following points: Acheson; Bardo; Bassano; Boyle; Cavendish; Chigwell; Coutts; Hynes; Hazeldine; Lacombe; Lousana; Midnapore; Oberline; Orion; Sabine; Spring Coulee; Spruce Grove; Stobart; Warspite; Whitelaw; Whitta; Villeneuve.

Elevators are being built at the following points: Alia; Athabasca; Balzac; Barnwell; Bennett; Bitten Lake; Brooks; Erosburn; Buoyant; Clonard; Coalhurst; Colinton; Conrich; Cowley; Charbonneau; Delcourt; Diamond City; Dimsdale; Dinnit; Grainger; Grantham; Hay Lakes; Indus; Langley; Lea Hurst; Lyall; Mirror; Morinville; Nevis; Pearce; Pibroch; Raley; River Bend; Rosebud; Rosemary; St. Albert; Strangmuir; Two Hills; Waskatenau; Weiss; Vimy.

FOUND—A bunch of keys. Owner may obtain same by calling at this office and paying for this ad.

Here and There

(297)
Arthur W. Gitten, Chicago wheat king, is erecting a hotel in his native city of Guelph, Ontario, which will be operated by the Canadian Pacific Railway. A golf course and pleasure park will be also established, the whole undertaking involving an expenditure of about \$2,000,000.

The sumptuous new Solarium lounge car put into service by the C. P. R. as rear end equipment aboard the Trans-Canada Limited is being nicknamed the "mustard plaster car". It was facetiously suggested by railway officials that the company should provide passengers with mustard plasters as it was recently claimed in England that these were more effective than ultra-violet rays. This contention was disproved, however, and the trouble taken by the railway is glazing the end sun room of the car with special vit-a-glass, which admits the ultra-violet and most beneficial rays of the sun, was justified.

Officials of the C. P. R. to the east can not speak to their conferees in the west—as in connection with the recent improvement and extension of the railways telegraph carrier system telephone facilities were also thrown open.

The community of globe trotters who made a circuit of the globe during the winter aboard the Canadian Pacific liner Empress of Australia contributed a series of remarkable items to the social notes of the New York newspapers when their vessel terminated her voyage there. An engagement, a marriage, and the birth of five children to a Japanese passenger were announced, constituting in the opinion of Captain Latta, commander of the cruise ship, something hitherto unrecorded in seafaring annals. The five Japanese babies were appropriately named the "Empress of Australia," "Empress of Scotland," "Empress of France," "Empress of Canada," and "Empress of Russia," after the giants of the Canadian Pacific fleet. The babies were canaries.

D. C. Coleman, vice-president of western lines of the Canadian Pacific Railway, has been elected a director of the Metropolitan Life Insurance Company of New York. The only other Canadian director is Hon. L. A. Taschereau, Premier of the Province of Quebec.

A tunnel built at a cost of \$250,000 makes it now possible for trains from North Vancouver to connect with the Canadian Pacific Transcontinental system. The first train making use of this new connecting link that also makes use of the second narrows bridge and the harbour rail system, carried the Governor-General and many distinguished westerners.

Fuorals and weddings can hold no terrors for Captain Frank Middleton, of the Canadian Pacific ship "Athletia," who has been presented with no less than three top hats. As captain in charge of the vessel entering the ports of Sault Ste. Marie, Port McNicoll and Fort William for the first time this season, opening navigation at each point, he was given the traditional welcome address and presented with a silk hat on each occasion. His three shining top hats repose in a neat row in his cabin and it is estimated that it will take three hundred years to wear them all out.

The roads have been drying very rapidly.

W. G. Smith has been appointed as Weed Inspector for the Raymond district.
